Project Documentation: Wedding Services Website

By: Ghayda' Bdoor

Orange Coding Academy - Masterpiece Project

1. Introduction

Project Name: Wedding Services in Irbid, Jordan

Purpose: This website provides a platform for booking wedding venues, farms, photographers, bridal dresses, and invitation card design services related to weddings in Irbid, Jordan. Users can register, browse, and book these services directly on the platform.

2. Features Overview

The website offers the following services related to wedding preparation in Irbid, Jordan:

- 1. Booking wedding venues or farms
- 2. Booking photographers
- 3. Invitation card design
- 4. Booking bridal dresses
- 5. Upcoming service: Food and drink catering (mini foods for occasions)

Additional functionality includes user account creation, profile management, and service history.

3. Main Functionalities

3.1 User Account Management

Users can create an account, log in, and access their profile page. On the profile, users can:

- View and edit registered information
- Access previously booked services
- Manage their bookings

3.2 Wedding Venue Booking

Users can browse wedding venues or farms in Irbid. For each venue, a card is displayed with options to:

- View venue details
- Book the venue (with a form submission)

The admin coordinates with venue owners to update available dates and times for bookings (between 4 PM and 12 AM). The system checks the availability of the selected time slot before proceeding to payment via PayPal.

3.3 Photographer Booking

Users can browse photographers, view their portfolios, and book services using a similar process as venue bookings. The system displays details about each photographer, including previous works, prices, and availability.

3.4 Bridal Dress Booking

Users can browse bridal dresses and book them online. This functionality mirrors the venue and photographer booking processes, with dress details provided on each card.

3.5 Invitation Cards

As a gift for booking a wedding venue or farm, users can design their own invitation card using templates available on the website. Once the user fills out a form with the required details, the admin will review it and send the final design by email.

4. Upcoming Services

The website will soon include a catering service for weddings, offering a variety of mini foods for special occasions. This service will follow a similar booking mechanism to the other services.

5. Payment System

The website integrates PayPal as the payment gateway. After a service is booked and availability is confirmed, the user is directed to PayPal for payment processing.

6. Admin Role

The admin is responsible for:

- Managing bookings
- Coordinating with service providers (venue owners, photographers, etc.)
- Updating the availability of venues and services
- Reviewing and approving invitation card designs
- Managing user inquiries and feedback

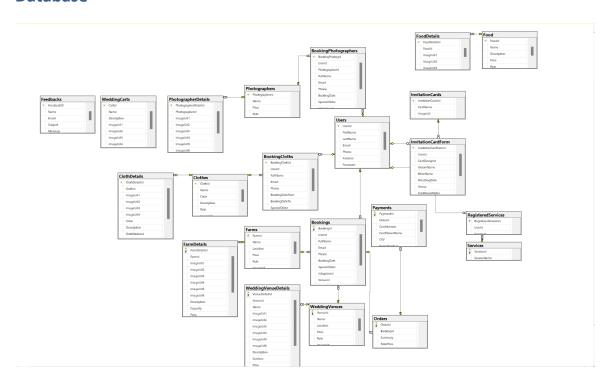

7. Conclusion

This platform simplifies the process of booking various wedding-related services in Irbid, Jordan. It provides users with a centralized location for organizing their special day, while allowing service providers to manage their bookings efficiently.
